

My family and I have subscribed to satellite radio for over a year now. We have family members all over the US and use both XMSR and Sirius systems. We find the program content and quality excellent and the new Instant Traffic and Weather is very helpful and provides the kind of service not available on land based stations. We as a family would be very upset if NAB's Petition 04-160 was passed. We strongly urge you to reject petition 04-160. Thank you,
Arthur E Hahn and family members across the USA
